- JavaScript
- NextJS
- Tailwind
- ReactJS
- React Native
- HTML / CSS
- Git / GitHub / Bitbucket

EXPERIENCE

FULL STACK DEVELOPER

IC Control Media & Sport, Stockholm, 2023 - current

I play a key role in developing core features for the globally leading platform for competition management in competitive swimming on both web and mobile - Swimify. My work on the Swimify web modules as well as the two smartphone apps has contributed to making six countries almost exclusively going over to our digitalised solution regarding competition management.

FRONT END DEVELOPER

School of Applied Technology, Stockholm, 2022 - 2023

Consultant, full-stack developer. I undertook projects at the School of Applied Technology, both independently and collaboratively. My focus was primarily on in house React projects.

SENIOR SPORT ANALYST

Swedish Olympic Committee, Stockholm (prior to programming)

I contributed to establishing and was an integral part of building the first Sport Analytics team at the Swedish Olympic Committee. Engaging across diverse sports and software platforms for roughly a decade. My efforts were dedicated to optimising athlete and team performance during critical moments and were part of placement improvements of roughly 15-25%.

EDUCATION

ZERO TO MASTERY ACADEMY

Complete Web Developer in 2023

SCHOOL OF APPLIED TECHNOLOGY, STOCKHOLM

Full Stack Developer, JavaScript, 2022

SWEDISH SCHOOL OF HEALTH & SPORT SCIENCE, STOCKHOLM

B.S. Sport Science, 2009
